ZW Cumulated index medicus.
1 v. 1- 1960-
I384 [Bethesda, Md.] National Library of Medicine.
v. in
Vols. for 1971- issued as DHEW publication no.
(NIH) 72-259, etc.
Annual cumulation of the monthly issues of Index medicus (new series), shelved with that publication.
Supersedes the Quarterly cumulative index medicus.
Issued 1960-64 by the American Medical Association, Chicago. Issues for 1965- for sale by the Supt. of Docs., U. S. Govt. Print. Off., Washington.
Issues for 1967- include the Bibliography of medical reviews.
1. Bibliography of Medicine - periodicals 2. Medicine - indexes I. American Medical Association. II. Index Medicus. III. National Library of Medicine. IV. Series: DHEW publication ; no. (NIH) 72-259, etc.

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C. 20402 - Price \$202 per 14-part set
Sold in sets only

THE INDEXING OPERATIONS

Materials selected for inclusion are indexed by being assigned a heading. The content of each place is defined by an indexing code selected from Medical Subject Headings (MSH). The Library's controlled vocabulary of indexed terms, MSH, is published as Part 2 of the January Index Medicus and is reproduced in its entirety in Cumulated Index Medicus. Additional copies of which may be purchased from the Government Printing Office, may also be purchased from the publisher of Index Medicus.

In addition, the heading subject is being applied headings in its entirety to describe adequately the content of each article or chapter.

1. Headings from MSH, Volume 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

The Index Medicus has generally been used as a source of medical terms in which words appear in the Index Medicus. If he does not find a given term in the alphabetical list, he may find it in the appropriate "see structure" or "see structure" or a "see structure" from which the desired literature might have been indexed. When a trouble term is found, examination of nearby words in the alphabetical list may reveal related terms that are also worth consulting in the Index Medicus Subject Section.

INTRODUCTION

Index Medicus is the National Library of Medicine's monthly bibliography of the literature of biomedicine. The cumulated contents of the twelve monthly issues (January-December) comprise the annual *Cumulated Index Medicus*.

MATERIALS INDEXED

Index Medicus contains citations to the serial journal literature and to selected monographs.

In the selection of materials for indexing, the National Library of Medicine is advised by a group of distinguished physicians, medical editors, and medical librarians. The Library indexes the literature that has been judged most useful to *Index Medicus* users, but it is not possible to include every journal and monograph that might contain useful articles.

An effort is made to maintain a reasonable balance of subject matter. The inclusion of a journal or monograph should not be construed as indicating that it is considered superior to one that is not indexed; the omission of a publication does not necessarily reflect on its quality.

Original journal articles are indexed, as well as those letters, editorials, biographies, and obituaries that have substantive contents. Abstracts of articles are never indexed. In certain journals which cover fields other than biomedicine, only those articles related to biomedicine are selected for inclusion in *Index Medicus*.

Monographs which have been indexed include published proceedings of various congresses and symposia, and selected multi-authored works. Each issue of *Index Medicus* and *Cumulated Index Medicus* carries a list of monographs indexed therein.

The journal title abbreviations used in *Index Medicus* are formulated according to the rules of the *American National Standard for the Abbreviation of Titles of Periodicals*,¹ and the individual words of the titles are abbreviated according to the forms given in the *Liste d'Abbreviations de Mots des Titres de Périodiques*.²

For the abbreviation of any specific journal cited in *Index Medicus*, see the *List of Journals Indexed in Index Medicus (LJI)* in the January issue of *Index Medicus* and in the annual cumulation. *LJI* is also available separately from the Government Printing Office (see National Library of Medicine Publications, inside front cover of any monthly issue of *Index Medicus*).

THE INDEXING OPERATION

Materials selected for inclusion are indexed by highly trained literature analysts. The content of each piece is described by assigning terms selected from *Medical Subject Headings (MeSH)*, the Library's controlled vocabulary of technical terms. *MeSH* is published as Part 2 of the January *Index Medicus* and is reproduced in its entirety in *Cumulated Index Medicus*. Additional copies of *MeSH* may be purchased from the Government Printing Office (see NLM Publications, inside front cover of *Index Medicus*).

In indexing, the analyst assigns as many subject headings as are necessary to describe adequately the content of each article or chapter.

Each journal article or monograph chapter is cited in *Index Medicus* only under those subject headings which represent the most important concepts of the article. All subject headings are stored in MEDLARS (Medical Literature Analysis and Retrieval System), the Library's computer-based file of citations, for future use in machine retrieval.

In *Index Medicus*, citations are published only under terms appearing in *MeSH*. If the medical concept sought is not in *MeSH* the *MeSH* equivalent must be found. For example, citations on German measles, will appear in *Index Medicus* under its *MeSH* equivalent, RUBELLA.

When materials are indexed for *Index Medicus*, the most specific terms available in *MeSH* are used. Thus, if an article is concerned with erythromycin, it would be indexed under that term, rather than the broader "antibiotics." Under the latter term, one would find only: (a) articles dealing with antibiotics generally, (b) those that deal in a very general way with a large number of named antibiotics, or (c) those that deal with specific antibiotics which have not been separately listed in *MeSH*.

The user who is interested in one concept may find that the broader term is also worth examining for articles or chapters of possible interest. Although one may be interested primarily in penicillin sensitivity, reports on the general subject of antibiotic sensitivity may be useful.

The user who wants information on some aspect of the use of antibiotics in pediatric practice would certainly want not only the general materials that would appear under "antibiotics," but also those concerned with specific antibiotics.

Because it is impossible to group together all terms directly or indirectly related to a particular concept, the following should be considered when searching this bibliography:

1. Direct form of the term (e.g., Lung Abscess)
2. Inverted form of the term (e.g., Anemia, Hemolytic)
3. Broader and narrower terms

The best way to find broader and narrower terms is by reference to the *MeSH* "tree structures," in which *MeSH* terms are grouped into fourteen subject categories and arranged in a hierarchical manner with specific terms indented under the more general ones. For example, in section D20, under "antibiotics," many types of antibiotics, such as "antibiotics, antineoplastic" are listed. Indented under that term are several even more specific terms. (Terms followed by an asterisk (*) may be used for machine retrieval, but never appear as subject headings in *Index Medicus*.) Thus, broader or narrower terms may be found merely by scanning these hierarchical lists.

4. Noun form (Liver, Kidney, Brain)
5. Adjective form (Hepatic, Renal, Encephal- and Cerebr-)
6. Function words which imply the concept in mind (Thinking for Brain, Digestion for Gastrointestinal System)
7. Terms for techniques which imply the concept in mind (Electrocardiography for Heart)
8. Synonyms or near-synonyms (e.g., Vertigo for Dizziness)

The *Index Medicus* user generally starts with one or more medical terms in mind which express his own subject interest. If he does not find a given term in the alphabetical list, examination of an appropriate "tree structure" may reveal a synonym or a broader term under which the desired literature might have been indexed. When a usable term is found, examination of nearby entries in the alphabetic list may reveal related terms that are also worth searching in the *Index Medicus* Subject Section.

¹ American National Standards Institute. American National Standard for the Abbreviations of Titles of Periodicals. Approved September 16, 1969. New York, ANSI, 1430 Broadway, New York 10018.

² Published by the Centre International d'Enregistrement des Publications en Série, 20, Rue Bachaumont, 75002 Paris, France.

SUBJECT SECTION

Each article or monograph chapter cited in *Index Medicus* is printed under one or more subject headings, and the entry appears in full under each.

Journal Articles:

Each entry contains the following elements, in order: original English title of article, or English translation of title; first author (if more than one) or sole author; journal title abbreviation; volume number; issue, part or supplement; inclusive pagination; date of issue; the notation Eng. Abstr. for those non-English articles which provide an abstract in English; and an abbreviation indicating the language of the article if other than English. The journal title abbreviation is in bold-face type; the full journal title may be found in the abbreviations listing in the *List of Journals Indexed in Index Medicus*.

Monograph Chapters:

Each entry contains the following elements, in order: original English title of the chapter, or English translation thereof; inclusive pagination; first author (if more than one) or sole author; the word "In," followed by the name of the editor or compiler of the monograph; title of the monograph; place of publication; publisher; date of publication; NLM call number; and an abbreviation indicating the language of the piece if other than English.

The non-English language abbreviations are as follows:

Afr	Afrikaans	Jpn	Japanese
Alb	Albanian	Kor	Korean
Ara	Arabic	Lit	Lithuanian
Arm	Armenian	Mul	Multilingual
Aze	Azerbaijani	Nor	Norwegian
Bul	Bulgarian	Per	Persian (Modern)
Chi	Chinese	Pol	Polish
Cze	Czech	Por	Portuguese
Dan	Danish	Pus	Pushto
Dut	Dutch	Rum	Rumanian
Fin	Finnish	Rus	Russian
Fre	French	SCC	Serbo-Croatian, Cyrillic
Geo	Georgic	SCR	Serbo-Croatian, Roman
Ger	German	Slo	Slovak
Gre	Greek (Modern)	Slv	Slovene
Heb	Hebrew	Spa	Spanish
Hun	Hungarian	Swe	Swedish
Ice	Icelandic	Tha	Thai
Ind	Indonesian	Tur	Turkish
Ita	Italian	Ukr	Ukrainian
		Vie	Vietnamese

Under each subject heading, the entries are grouped according to the original language of the text, with the English-language items appearing first, followed by citations for works published in other languages, arranged alphabetically by language. Within each language group, the articles are alphabetically ordered by journal title abbreviation. Monograph chapters are cited under the letter "I" in this ordering.

Examples of typical journal article citations are:

An article by J. I. Ausman, et al., titled:

Intraparenchymal embolization for obliteration of an intramedullary AVM of the spinal cord. Technical note. Ausman JJ, et al. *J Neurosurg* 47(1):119-25, Jul 77

is cited under three subject headings:

ARTERIOVENOUS MALFORMATIONS/SURGERY EMBOLIZATION, THERAPEUTIC/METHODS SPINAL CORD/BLOOD SUPPLY

Under each of the subject headings, only the first author's name appears. For the names of all other authors, refer to the Author Section.)

An article by V. S. Moshkevich and S. I. Krichevskaja is cited under the headings ACETYLCHOLINE/ANTAGONISTS & INHIBITORS, ACETYLCHOLINE/BLOOD, HAY FEVER/BLOOD, HISTAMINE/BLOOD and HISTAMINE ANTAGONISTS/BLOOD:

[Dynamics of the content of histamine, acetylcholine and their inhibitors in patients with allergic rhinitis] Moshkevich VS, et al. *Vestn Otorinolaringol* (2):74-8, Mar-Apr 77 (Eng. Abstr.) (Rus)

The brackets indicate that the title has been translated. The notation in parentheses indicates that this article has an English abstract.

An example of a typical monograph chapter citation is:

Physiological and behavioral effects of intravenous cocaine in man. pp. 647-64. Fischman MW, et al.

In: Ellinwood EH Jr., Kilbey MM, ed. *Cocaine and other stimulants*. New York, Plenum Press, 1977. W3 AD215 v. 21 1975.

This reference cites a chapter authored by M. W. Fischman and others, which appears on pages 647-664 in a monograph edited by E. H. Ellinwood, Jr. and M. M. Kilbey. The appended notation W3 AD215 v.21 1975 is the National Library of Medicine call number for this monograph: the List of Monographs Indexed in the monthly *Index Medicus* and in the *Cumulated Index Medicus* and the *NLM Current Catalog* may be consulted for the full catalog entry.

AUTHOR SECTION

References in the Author Section cite a maximum of three authors' names. The author's name is the first element in most Author Section citations, followed by the title of the article or monograph chapter in the vernacular, and then the other bibliographic elements as they appear in the Subject Section (described above). The title of the article is supplied in translated form only (as in the Subject Section), and not in the vernacular, for citations in the following languages: Arabic, Armenian, Azerbaijani, Chinese, Georgic, Hebrew, Indonesian, Japanese, Korean, Persian, Pushto, Thai, and Vietnamese. Titles in the following languages are transliterated into Roman script: Bulgarian, Greek, Russian, Serbian, and Ukrainian. Following are examples of citations found in the Author Section:

English language, or translated into English:

Rendtorff RC, Curran JW, and Chandler RW, et al: The role of the urban community hospital in gonorrhoea surveillance. *Br J Vener Dis* 52(2):102-4, Apr 76

Kawamura N, Ohkoshi M, Saito T, et al: [Clinical experiment of gentamicin in patients with urological diseases (author's transl)] *Jpn J Antibiot* 29(3):299-302, Mar 76 (Jpn)

Prange AJ Jr, Wilson IC, Breese GR, et al: Hormonal alteration of imipramine response: a review. pp. 41-67. In: Sachar EJ, ed. *Hormones, behavior, and psychopathology*. New York, Raven Press, 1976. WK 102 A512h 1975. (122 ref.)

Vernacular:

Koba S, Nowak S: Objawy i zespoły neurologiczne w przebiegu wirusowego zapalenia wątroby Przegl Epidemiol 30(1):139-45, 1976 (Pol)

Transliterated into Roman script:

Proshunina DV, Gubii NA, Fleish NL, et al: Pro stroky zberihannia deiakykh in'iektiinykh rozchyniv, shcho chasto povtoriut'sia v mizhlikarnianykh aptekakh. Farm Zh 31(1):84-90, Jan-Feb 76 (Ukr)

Complete citations are printed only under the first author's name; the second and third authors' names are cross referenced to the full reference under the senior author's name, as:

Chandler RW see Rendtorff RC

Nowak S see Koba S

Gubii NA see Proshunina DV

Saito T see Kawamura N

Articles about individuals are cited in the Author Section with the subject's name enclosed in parentheses and preceding the other components of the entry. A separate entry is also provided under the name of the author in the usual manner. Anonymous biographies and obituaries appear only under the subjects' names.

Example:

(Freud S) Oppenheim FM: Royce's community: a dimension missing in Freud and James? J Hist Behav Sci 13(2):173-90, Apr 77

(James W) Oppenheim FM: Royce's community: a dimension missing in Freud and James? J Hist Behav Sci 13(2):173-90, Apr 77

(Royce J) Oppenheim FM: Royce's community: a dimension missing in Freud and James? J Hist Behav Sci 13(2):173-90 Apr 77

Oppenheim FM: Royce's community: a dimension missing in Freud and James? J Hist Behav Sci 13(2):173-90, Apr 77

A separate subsection is provided at the end of the Author Section for anonymous non-English language references. Special treatment is accorded the material in order to have an authentic reference to the work in the original language form. In this subsection, the journal article entries are arranged alphabetically under the journal title abbreviation; monograph chapters are cited under the letter "T" in this arrangement.

MEDICAL REVIEWS

Medical reviews are defined by the Library as well-documented surveys of the recent biomedical literature. In most cases the surveys include a list of references either in the body of the paper or as a bibliography. Articles or monograph chapters which include case reports are considered reviews only when the case reports serve to document the subject of the review.

Materials with the following characteristics are *not* considered as reviews: case reports or original research articles containing a review of the literature as an adjunct; statistical and epidemiological surveys; historical reviews; bibliographies which comprise only a listing of references; monthly summaries of subject areas which appear as a regular feature in journals; theses; and lengthy publications covering many aspects of a specific subject which are more appropriately considered as refresher courses rather than reviews.

Citations to reviews are included in the "Medical Reviews" section of the monthly *Index Medicus* and *Cumulated Index Medicus* as well as in the Subject Section of each.

OTHER BIBLIOGRAPHIC TOOLS

In many specialized fields of medicine, and in many allied sciences, there are available a variety of excellent indexes and abstracts, such as *Chemical Abstracts* and *Biological Abstracts*. More than 3,500 titles, with asterisks marking basic references especially useful to the smaller medical library, are listed in *Medical Reference Works, 1679-1966: A Selected Bibliography* (Chicago, Medical Library Association, 1967) and its supplements. Special information centers sponsored by medical institutions or professional societies exist to serve users interested in their respective subject fields. For current information about such additional aids relating to special subject interests, the *Index Medicus* user should consult his local medical librarian.

Users of *Index Medicus* are invited to send suggestions or refer any errors they find to the attention of:

PREFACE TO 1977 MeSH

This 1977 issue of *Medical Subject Headings (MeSH)* is presented as the primary listing of subject descriptors which appear in *Index Medicus*.

As in previous years, citations will be found in *Index Medicus* only under those subject headings that appear in large type in this version of *MeSH*. However, terms which are "see under" cross references in *Index Medicus* are sometimes used by catalogers, and are separately searchable in the MEDLINE and CATLINE computer files.

The health science users who have direct on-line access to the MEDLINE computer data base will find the annotated version of *MeSH* better suited to their needs. This contains geographic headings, "check tags," such as male, female, human, and other data elements that are of value to the MEDLINE searcher, but that have no relevance for *Index Medicus*. This publication is available through the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161.

The Library wishes to express its gratitude to the many scientists who have had sufficient interest to criticize various terms in *MeSH* and to make suggestions for its improvement. They thus assist the Library in its efforts to keep abreast of knowledge in the expanding fields of the health sciences.

Martin M. Cummings, M.D.
Director
National Library of Medicine

PREFACE TO 1977 EDITION

The 1977 edition of *Selected Topics in Polymer Chemistry* is presented as the primary source of information on polymer chemistry to the polymer community.

All in previous editions of this book have been retained in this edition, but the format has been revised. The format of the book has been revised to make it more useful to the polymer community. The format of the book has been revised to make it more useful to the polymer community.

The book is written for the polymer community. The book is written for the polymer community. The book is written for the polymer community. The book is written for the polymer community. The book is written for the polymer community.

The book is written for the polymer community. The book is written for the polymer community. The book is written for the polymer community. The book is written for the polymer community. The book is written for the polymer community.

MAISON M. LAMARCA, M.D.
INSTRUCTOR
NATIONAL LIBRARY OF MEDICINE

MeSH INTRODUCTION

The 1976 edition of *Medical Subject Headings* is the current revision of the authority list for the subject analysis of the biomedical literature in the National Library of Medicine. It presents the subject headings under which all citations will appear in *Index Medicus*, serves as the basis for search formulations in retrieval by computer of bibliographic citations stored in the MEDLARS (Medical Literature Analysis and Retrieval System) computer files, and is the standard subject heading list for the subject cataloging of books in the Library.

The MEDLARS computer programs have recently undergone major changes to take better advantage of the greater capabilities of today's computers. The major benefits of these changes will be realized by users of MEDLINE, the National Library of Medicine's on-line remote access citation retrieval system. The user of *Index Medicus* will benefit chiefly through the availability of a *MeSH* containing many more cross references than ever before. This edition of *MeSH* is designed particularly for the needs of the *Index Medicus* users. Also included is prefatory material of special interest to medical librarians and catalogers.

Medical Subject Headings is divided into two sections: Alphabetic List and Categorized Lists (Trees).

ALPHABETIC LIST

The Alphabetic List section contains the Subject Headings arranged in alphabetic order and cross referenced.

In selecting terms as subject headings, the most commonly used forms of English expression are generally preferred. Because of the multiple sources from which the English language was derived, the *MeSH* user must consider various related expressions. Thus, one interested in lungs may wish to consider looking also for terms containing the word roots pulm- and pneumo-. For kidney, consider also renal and nephro-.

The subject headings have been constructed primarily for the convenience of the user of *Index Medicus*. Therefore, direct natural-language sequence is not always used. When a group of terms share a basic concept, they are arranged sequentially under that concept and not scattered throughout the alphabet. For example, tuberculosis in its various forms and relationships is expressed by a series of headings starting with TUBERCULOSIS (TUBERCULOSIS, AVIAN; TUBERCULOSIS, BOVINE; TUBERCULOSIS, CARDIOVASCULAR).

The criteria for selection of subject headings are based on: frequency of term usage in the medical literature; recognition of need for the term by various users of *MeSH*; recommendation by advisory panels on terminology; and the ability to assign a relatively clear and precise definition to the term.

Citations will be found in *Index Medicus* only under the *MeSH* headings that appear in large type. All other entries in the Alphabetic List are cross references, leading the user, directly or indirectly, to appropriate *Index Medicus* headings.

Cross references are of several kinds:

Referring to another term	Corresponding "referred from" designation
See	X
See under	XU
See related	XR

For each cross reference there is a reciprocal backward reference. For example:

LUTEINIZING HORMONE see LH
LH
X LUTEINIZING HORMONE

"See under" is used to refer from a specific term that does not appear as an *Index Medicus* heading to a more general term which does.

The usage of the "see" cross reference differs somewhat from the practice in editions of *MeSH* for 1974 and earlier years. The "see" reference formerly directed the user from a synonym to an *Index Medicus* heading. In our current usage, the terms contained in a "see" reference are no longer necessarily strictly synonymous, but bear a close relationship.

Also in contrast to previous *MeSH* practice, a "see" reference may sometimes refer the user

to a "see under" reference, rather than directly to a heading that appears in *Index Medicus*. For this reason, the user of *MeSH* should always consult *MeSH* for the term to which the "see" refers, before looking for citations in *Index Medicus*. Thus, *MeSH* indicates: "KETAZONE see KETOPHENYLBUTAZONE," but KETOPHENYLBUTAZONE is not a heading under which citations may appear in *Index Medicus*. If one looks up KETOPHENYLBUTAZONE in *MeSH*, one finds "KETOPHENYLBUTAZONE see under PHENYLBUTAZONE." PHENYLBUTAZONE is the heading under which any *Index Medicus* citations concerning ketazone will be found. These double references have arisen incidental to certain *MeSH* changes that were instituted to improve the MEDLINE computer search capabilities. It may be possible to modify succeeding editions of *MeSH* so that the *Index Medicus* user will be led directly from the original term to the term under which citations are to be found in *Index Medicus*. In the meantime, the double reference would appear preferable to complete omission of the initial entry term.

The "see related" reference is used primarily to indicate related terms not occurring in the same category that may contain citations of direct pertinence to the area of interest. As in previous editions the most obvious cross references, as those from an organ to its diseases, are avoided.

The "see also specific" reference that appeared in earlier editions of *MeSH* is no longer used.

Each *Index Medicus* heading is followed by one or more numbers that direct the user to the place or places in the "trees" where the term is to be found.

CATEGORIZED LISTS (TREES)

The "trees" are lists in which the subject headings are categorized, as Anatomy (Category A), Organism (Category B), etc. Each category is further subdivided into subcategories, each of which is identified by an alphanumeric designation. Thus, B1 includes Invertebrates, B2 includes Vertebrates, etc. The *MeSH* terms in each subcategory are arranged hierarchically, at as many as seven levels, from the most general to the most specific. Because of the branching structure of the hierarchies, these lists are sometimes referred to as "trees," for brevity. Each *MeSH* term appears in at least one place in the trees, and may appear in as many additional places as may be logically appropriate.

Although National Library of Medicine staff have consulted numerous respected sources in the process of developing the trees, these trees should not be regarded as representing an authoritative classification system. These are merely arrangements of terms for the guidance and convenience of persons who are assigning subject headings to or searching for literature in *Index Medicus* and in other National Library of Medicine products and services. The trees contain only those terms that have been selected for inclusion in this thesaurus, and their structure frequently represents a compromise of the views and needs of particular disciplines and users, in the absence of any one arrangement that is universally right for all times and uses.

The persons who index articles for inclusion in MEDLARS are instructed to find and use the most specific *MeSH* term that is available to represent each indexable concept. For example, articles concerning streptomycin will be found under the heading STREPTOMYCIN, while an article containing a new agent which is not yet in the vocabulary will be listed under the broader term ANTIBIOTICS. The indexers use the trees to locate appropriate headings. The user of *Index Medicus* may also consult the trees to find additional subject headings to express concepts within his area of interest, whether at the same level or at a higher or lower level of specificity.

In the trees, each term is followed by the number that indicates its tree location. It may also be followed by one or more additional numbers, in smaller type, indicating other tree locations of the same term.

Terms that are "see under" references in the Alphabetic List appear in the trees and are indicated by an asterisk. One must bear in mind that citations concerned with these concepts do not appear in *Index Medicus* under these headings. However, citations may be sought under these terms in MEDLINE, the National Library of Medicine's computerized online citation retrieval system, and in some specialized MEDLARS recurring bibliographies. For this reason, these terms are sometimes referred to as "minor descriptors."

If a concept is represented in *MeSH* by a "see under" reference, citations concerned with that concept will be found in *Index Medicus* under the heading indicated by the cross reference, and not necessarily under headings suggested by other tree locations. For example, "SILO FILLER'S DISEASE see under LUNG DISEASES" bears two tree numbers—one in-

dicating a tree listing under LUNG DISEASES, and the other, a tree listing under AGRICULTURAL WORKERS' DISEASE. Although citations concerning silo filler's disease may indeed be of interest to a person who is concerned with agricultural workers' diseases, the articles about silo filler's disease are cited in *Index Medicus* under the heading LUNG DISEASES, as indicated by the cross reference.

The trees also contain some terms that are followed by the designation (NON MESH). These are included for the purpose of indicating the logical structure and have no other function for *Index Medicus* users. NON MESH terms are never used for indexing, and are not included in the Alphabetic List.

Because this edition of *MeSH* is designed primarily for *Index Medicus* users, geographic headings, and other items and data elements that are of use to the cataloger or MEDLINE searcher, have been omitted. For these purposes, use of *Medical Subject Headings Annotated Alphabetic List, 1977* is recommended. This is available from:

National Technical Information Service
U.S. Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22151

NEW HEADINGS AND DELETIONS

A listing of new headings which have been introduced with 1977 *MeSH* is included along with the headings to which most of the articles relating to these concepts were previously indexed. A list is also furnished of headings which have been deleted, with the subject headings that have replaced them.

SUBHEADINGS

There are sixty-eight subheadings which are used in conjunction with the subject headings. They afford a convenient means of grouping together those citations which bear on a particular aspect of a subject. Of course, not every subheading is suitable for use with every subject heading. A given subheading is used only with subject headings that are assigned to the subcategories shown in parenthesis after the subheading, in the following list.

Abnormalities (A1-9, A13-15)—Used with organs for congenital defects producing changes in the morphology of the organ.

Administration & Dosage (D)—Used with drugs for dosage forms, routes of administration, frequency and duration of administration, quantity of medication, and the effects of these factors.

Adverse Effects (D, E, F4, H, J)—Used with drugs, chemicals, biological and physical agents, and manufactured products for unintended or undesirable reactions occurring in normal usage or accepted dosage; includes hypersensitivity or idiosyncrasy. Used for adverse effects or complications of diagnostic, therapeutic, anesthetic, surgical and other procedures.

Analogs & Derivatives (D1-7, D9-26)—Used with drugs and chemicals for substances that share the same parent molecule or have similar electronic structure but differ by the addition or substitution of other atoms or molecules. Used when the specific chemical heading is not available, and no appropriate group heading exists.

Analysis (A, B1, B3-6, C4, D, G3, J)—Used for the identification or quantitative determination of a substance or its constituents and metabolites; includes the chemical analysis of tissues, tumors, body fluids, organisms, plants, air, water or other environmental carrier. Applies to both methodology and results. For analysis of substances in blood, cerebrospinal fluid, and urine, the specific subheading designating the fluid is used.

Anatomy & Histology (A, B1-2, B5-6)—Used with organs, regions, and tissues for normal descriptive anatomy and histology; used for normal anatomy and structure of animals and plants.

Antagonists & Inhibitors (D)—Used with chemicals, drugs, and endogenous substances to indicate substances or agents which counteract their biological effects by any mechanism.

Biosynthesis (D)—Used for the formation of chemical substance in organisms, in living cells, or by subcellular fractions.

Blood (B2, C, D, F3)—Used for the presence of or analysis of substances in the blood; also for examination of, or changes in, the blood in disease states. Excludes serodiagnosis, for which "Diagnosis" is used, and serology, for which "Immunology" is used.

Blood Supply (A1-6, A8-10, A13-16, C4)—Used for arterial, capillary, and venous sys-

- tems of an organ or region whenever the specific heading for the vessel does not exist; includes blood flow through the organ.
- Cerebrospinal Fluid (B2, C, D, F3)**—Used for the presence or analysis of substances in the cerebrospinal fluid; also for examination of or changes in cerebrospinal fluid in disease states.
- Chemical Synthesis (D)**—Used for the chemical preparation of molecules in vitro. For the formation of chemical substances in organisms, living cells, or subcellular fractions, use "Biosynthesis."
- Chemically Induced (C, F3)**—Used for diseases, syndromes, congenital abnormalities or symptoms caused by chemical compounds in man or animals.
- Classification (B, C, D, E, F, G, H, I, J, K, L, M, N)**—Used for taxonomic or other systematic or hierarchical classification systems.
- Complications (C, F3)**—Used with diseases to indicate conditions that co-exist or follow, i.e. co-existing diseases, complications, or sequelae.
- Congenital (C1-15, C17-23)**—Used with disease headings to indicate those conditions existing at, and usually before birth; excludes morphologic abnormalities and birth injuries, for which "Abnormalities" and "Injuries" are used.
- Cytology (A, B)**—Used for normal cellular morphology of unicellular and multicellular organisms.
- Deficiency (D)**—Used with endogenous and exogenous substances which are absent or in diminished amount relative to the normal requirement of an organism or a biologic system.
- Diagnosis (C, F3)**—Used with diseases for all aspects of diagnosis, including examination, differential diagnosis and prognosis; excludes mass screening for which "Prevention & Control" is used. "Radiography" is used for radiographic diagnosis.
- Diagnostic Use (D, H)**—Used with chemical compounds, drugs, and physical agents when used for studies of clinical function of an organ, or for the diagnosis of human or animal diseases.
- Diet Therapy (C, F3)**—Used with disease headings for dietary and nutritional management of the diseases. Does not include vitamin or mineral supplements, for which "Drug Therapy" may be used.
- Drug Effects (A, B, F1-2, G4-11)**—Used with organs, regions, tissues, or organisms and physiological and psychological processes for the effects of drugs and chemicals.
- Drug Therapy (C, F3)**—Used with disease headings for the treatment or the prevention of the disease by the administration of drugs, chemicals and other therapeutic agents, such as antibiotics and tissue extracts. Excludes diet therapy, for which "Diet Therapy" is used and excludes biologicals for which "Therapy" is used.
- Education (E, F, G1-3, H, I, J, K, L, M, N1-2)**—Used for education and training programs in various fields and disciplines, and for training groups of persons.
- Embryology (A1-10, A13-15, B1-2, B6, C)**—Used with organs, regions, and animal headings for embryologic and fetal development; also used with diseases for embryologic factors contributing to postnatal disorders.
- Enzymology (A, B1, B3-6, C, F3)**—Used with organisms, except vertebrates, and with organs and tissues, also used with diseases for enzymes during the course of the disease. Excludes diagnostic enzyme tests, for which "Diagnosis" is used.
- Ethnology (Z)**—Used with geographic headings to indicate the place of origin of a group of people.
- Etiology (C, F3)**—Used with diseases for causative agents including microorganisms; includes environmental and social factors and personal habits as contributing factors; includes pathogenesis.
- Familial & Genetic (C, F3)**—Used for studies of genetic basis of disease; studies of diseases occurring in family groups due to environmental factors including infection, and common family dietary habits; includes hereditary disease.
- Growth & Development (A1-9, A13-15, B)**—Used with microorganisms, plants, and the postnatal period of animals for growth and development; includes postnatal growth or development of organs or anatomical parts.

History (C, D, E, F, G1-3, H, I, J, K, L, M, N)—Used for the historical aspects of any subject; includes brief historical notes. Excludes case histories.

Immunology (A, B, C, D, F3)—Used for immunologic studies of tissues, organs, microorganisms, fungi, viruses, and animals; includes immunologic aspects of disease but not immunologic procedures used for diagnostic, preventive, or therapeutic purposes, for which "Diagnosis," "Prevention & Control," or "Therapy" are used. Also used for chemicals as antigens or haptens.

Injuries (A1-9, A13-15)—Used with anatomic headings for wounds and injuries. Excludes cell damage, for which "Pathology" is used.

Innervation (A1-7, A9, A13-16)—Used with organs, regions, or tissues for their nerve supply.

Instrumentation (E, F2, F4, G1-3, H, J, L)—Used with diagnostic or therapeutic procedures, analytic techniques, and specialties or disciplines, for the development or modification of apparatus, instruments, or equipment.

Isolation & Purification (B1, B3-5, D)—Used with bacteria, viruses and fungi for the obtaining of pure strains, includes culture techniques. Also with biological substances and chemicals for the isolation and purification of the constituents.

Manpower (E6, F4, G1-2, H, I, J, L, N2-4)—Used with disciplines and programs for the demand, supply, distribution, recruitment and use of personnel.

Metabolism (A, B, C, D, F3)—Used with organs, cells and subcellular fractions, organisms, and diseases for metabolism; with drugs and chemicals for absorption, distribution, and excretion. For biosynthesis, enzymology, and secretion use the specific subheadings.

Methods (E, F4, G1-3, H, I, J, L, N)—Used with techniques, procedures, and programs for methods.

Microbiology (A, B1-2, B6, C, F3)—Used with organs, animals and higher plants and with diseases for microbiologic studies. For parasites, "Parasitology" is used.

Mortality (C, E, F3-4)—Used with diseases for mortality statistics, and with procedures for deaths resulting from the procedure.

Nursing (C, E, F3)—Used with diseases for nursing care and technics in their management; includes the nursing role in diagnostic, therapeutic, and preventive procedures.

Occurrence (C, F3)—Used with diseases for incidence and prevalence; includes endemic and epidemic outbreaks; includes surveys, and estimates of morbidity in geographic areas and in subdivisions of populations. Excludes mortality, for which "Mortality" is used.

Parasitology (A, B1-2, B6, C, F3)—Used with animals, higher plants, organs and diseases for parasitic factors; do not use if the parasitic involvement is implicit in the diagnosis.

Pathogenicity (B1, B3-5)—Used with microorganisms, viruses, and parasites for studies of their ability to cause disease in man or animals.

Pathology (A, C, F3)—Used for organ, tissue or cell structure in disease states.

Pharmacodynamics (D)—Used with drugs and exogenously administered chemical substances for their actions on tissues and organisms; includes effects upon metabolism, acceleration or inhibition of biological processes, and the mechanisms of action.

Physiology (A, B, D, F1-2)—Used with organs, tissues, and cells of unicellular and multicellular organisms for normal function; used also with biochemical substances, endogenously produced, for their physiologic role.

Physiopathology (A, C, F3)—Used with organs and diseases for disordered function in disease states.

Poisoning (D, J)—Used with drugs, chemicals and industrial materials for human or animal poisoning, acute or chronic, whether the poisoning is accidental, occupational, suicidal, by medication error, or by environmental exposure.

Prevention & Control (C, F1, F3, G3 I1)—Used with disease headings for increasing human or animal resistance against disease (e.g. immunization); for control of transmission agents; for prevention and control of environmental hazards; for prevention and control of social factors leading to disease; includes preventive measures in individual cases.

Radiation Effects (A, B, D, F1-2, G4-12, J)—Used for effects of ionizing and nonionizing radiation upon living organisms, organs and tissues and their constituents, and upon physiologic processes; includes effect of irradiation on drugs and chemicals.

Radiography (A, C, F3)—Used with organs, regions and diseases for x-ray examinations. Does not include radionuclide imaging for which the subheading "Diagnosis" and the main heading **RADIONUCLIDE IMAGING** are used.

Radiotherapy (C)—Used with disease headings for the therapeutic use of ionizing and nonionizing radiation; includes use of radioisotope therapy.

Rehabilitation (C, F3)—Used with diseases for the restoration of function of individuals suffering from the disease or injury.

Secretion (A, C4, D)—Used for the discharge across the cell membrane, into the intracellular space or ducts, of endogenous substances resulting from the activity of intact cells of glands, tissues or organs.

Standards (D, E, F4, G1-3, H, I, J, L, N)—Used with facilities, personnel, and program headings for the development, testing and application of standards of adequacy or acceptable performance; used with chemicals and drugs for standards of identification, quality and potency; includes health or safety standards in industries and occupations.

Supply & Distribution (D, E, F4, H, I, J, L, N2-4)—Used for the quantitative availability and distribution of material, equipment, health services, facilities, and personnel. Excludes food supply and water supply, for which main headings are used.

Surgery (A, B2, C, F3)—Used for operative procedures on organs, regions, or tissues in the treatment of diseases; also for surgery of vertebrate animals; includes tissue section

by lasers. Excludes transplantation, for which "Transplantation" is used.

Therapeutic Use (D, H)—Used with drugs, biological preparations, and physical agents for their use in the prophylaxis and treatment of disease; includes veterinary use.

Therapy (C, F3)—Used with diseases for therapies except drug therapy, diet therapy, radiotherapy, and surgery for which subheadings exist; also to be used for articles dealing with multiple therapies.

Toxicity (D, J)—Used with drugs and chemicals for experimental studies of ill effects on man or animals; includes studies to determine margin of safety or the reactions accompanying administration at various dose levels; used also for studies of exposure to environmental agents.

Transmission (C)—Used with diseases for studies of the modes of transmission.

Transplantation (A)—Used with organs, tissues or cells for transplantation from one site to another within the same subject, or from one subject to another of the same species or different species.

Ultrastructure (A, B, C4)—Used with tissue and cells (including neoplasms), and microorganisms for microanatomic structures, generally below the size visible by light microscopy.

Urine (B2, C, D, F3)—Used for the presence or analysis of substances in the urine; also for the examination of, or changes in, the urine in diseases.

Utilization (E, G1-3, H, I, J, L, N)—Used with equipment, facilities, programs, services, and health personnel for their actual use.

Veterinary (C1-21, C23, E)—Used for naturally occurring diseases in animals, or for diagnostic, preventive, or therapeutic procedures in veterinary medicine.

APPLICATION OF MEDICAL SUBJECT HEADINGS IN BOOK CATALOGING

The National Library of Medicine uses *Medical Subject Headings* as the authoritative source for cataloging books and periodicals added to the collection. For cataloging, however, the *MeSH* list is modified by the use of form, geographic, and language subheadings and by six additional topical subheadings. The form subheadings are:

abbreviations	encyclopedias	patents
abstracts	encyclopedias—popular works	periodicals
abstracts—bibliography	essays	periodicals—bibliography
acronyms	examination questions	periodicals—directories
aerial photographs	exhibitions	periodicals—union lists
amateurs' manuals	exhibitions—catalogs	personal narratives
anecdotes	experiments	phonodiscs
atlases	film catalogs	phonodiscs—catalogs
audiotapes	filmstrips	phonorecord catalogs
audiotapes—periodicals	filmstrips—catalogs	phrase books
audiovisual aids—catalogs	forms	pictorial works
audiovisual kits	guidebooks	popular works
bibliography	handbooks	popular works—periodicals
bibliography—union lists	humor	portraits
biobibliography	indexes	portraits—catalogs
biography	indexes—bibliography	problems
biography—juvenile literature	juvenile films	programmed texts
cartoons	juvenile literature	registers
case studies	juvenile phonorecords	slides
cases	laboratory manuals	societies
catalogs	legislation	societies—directories
charts	legislation—congresses	societies—periodicals
collected works	legislation—periodicals	societies—yearbooks
collections—catalogs	manuscripts—catalogs	spectra
congresses	maps	statistics
congresses—bibliography	microscopic slides	statistics—congresses
congresses—directories	motion picture loops	symbols
correspondence	motion pictures	tables
data tapes	motion pictures—catalogs	terminology
dictionaries	nomenclature	transparencies
directories	nursing texts	videotapes
directories—bibliography	outlines	yearbooks
drawings		

The following main headings are divided by geographic or language subheadings. They may be further subdivided by form subheadings when necessary.

ABORTION, INDUCED
ABORTION, LEGAL
ACADEMIES AND INSTITUTES
ACCIDENTS (all headings)
AIR POLLUTION
AIR POLLUTION, RADIOACTIVE
ANTHROPOLOGY (all headings)
AWARDS AND PRIZES
BALNEOLOGY
BIBLIOGRAPHY, NATIONAL
BIBLIOGRAPHY OF MEDICINE
BIOBIBLIOGRAPHY

BIOGRAPHY
BOOK INDUSTRY
BOOKSELLING
CAREER MOBILITY
CATALOGS, BOOKSELLERS'
CATALOGS, DRUG
CATALOGS, LIBRARY
CATALOGS, PUBLISHERS'
CATALOGS, UNION
CHARITIES
CHILD HEALTH SERVICES
CHILD WELFARE

CITY PLANNING	HEALTH SERVICES
CIVIL DEFENSE	HEALTH SURVEYS
COMMUNICABLE DISEASE CONTROL	HISTORY OF DENTISTRY
COMMUNITY HEALTH SERVICES	HISTORY OF MEDICINE (all headings)
COMMUNITY PHARMACY SERVICES	HISTORY OF NURSING
COMMUNITY MENTAL HEALTH SERVICES	HOMES FOR THE AGED
COMPREHENSIVE DENTAL CARE	HOSPITAL ADMINISTRATION
COMPREHENSIVE HEALTH CARE	HOSPITAL DESIGN AND CONSTRUCTION
COMPREHENSIVE HEALTH PLANNING	HOSPITAL OUTPATIENT CLINICS
CONSUMER ORGANIZATIONS	HOSPITAL PLANNING
CRIME	HOSPITALS (all headings)
DELIVERY OF HEALTH CARE	HOUSING
DEMOGRAPHY	INDUSTRIAL MEDICINE
DENTAL CARE	INCOME
DENTAL HEALTH SURVEYS	INFANT MORTALITY
DENTISTS	INFORMATION CENTERS
DENTISTS, WOMEN	INFORMATION SERVICES
DICTIONARIES (by language)	INSURANCE (all headings)
DICTIONARIES, CHEMICAL (by language)	INSURANCE, HEALTH
DICTIONARIES, DENTAL (by language)	INVERTEBRATES
DICTIONARIES, MEDICAL (by language)	JURISPRUDENCE
DICTIONARIES, PHARMACEUTICAL (by language)	JUVENILE DELINQUENCY
DIRECTORIES	LABORATORIES
DISEASE OUTBREAKS	LEGISLATION (all headings)
DRUG AND NARCOTIC CONTROL	LIBRARIES (all headings)
DRUG INDUSTRY	LIBRARY ASSOCIATIONS
ECONOMICS (all headings)	LIBRARY SERVICES
EDUCATION (all headings)	LIBRARY SURVEYS
EMERGENCY HEALTH SERVICES	LIBRARY TECHNICAL SERVICES
EMERGENCY SERVICES, PSYCHIATRIC (minor)	LICENSURE (all headings)
EMIGRATION AND IMMIGRATION	MATERNAL HEALTH SERVICES
ENVIRONMENT	MATERNAL MORTALITY
ENVIRONMENTAL HEALTH	MATERNAL WELFARE
ENVIRONMENTAL POLLUTION	MEDICAL ASSISTANCE
EPIDEMIOLOGY	MEDICAL ASSISTANCE, TITLE 19 (by state)
ETHNIC GROUPS	MEDICAL MISSIONS
EXPENDITURES, HEALTH	MENTAL HEALTH SERVICES
FAMILY PLANNING	MINERAL WATERS
FETAL DEATH	MORBIDITY
FINANCING (all headings)	MORTALITY
FISHERIES	NAMES
FOOD HABITS	NEOPLASMS—OCCURRENCE
FOOD INSPECTION	NURSES
FOOD SUPPLY	NURSING HOMES
FOOD TECHNOLOGY	NUTRITION SURVEYS
FOREIGN MEDICAL GRADUATES	OCCUPATIONAL HEALTH SERVICES
GOVERNMENT (all headings)	ORGANIZATIONS
HEALTH AND WELFARE PLANNING	PARASITES
HEALTH EDUCATION	PERIODICALS
HEALTH FACILITIES	PERSONAL HEALTH SERVICES
HEALTH FACILITY PLANNING	PHARMACISTS
HEALTH MAINTENANCE ORGANIZATIONS	PHARMACOPOEIAS
HEALTH MANPOWER	PHILOLOGY (by language)
HEALTH OCCUPATIONS	PHYSICAL EDUCATION AND TRAINING
HEALTH RESORTS	PHYSICIANS
	PHYSICIANS, WOMEN
	PLANTS, MEDICINAL

POLITICS
 POPULATION (all headings)
 POVERTY
 PREVENTIVE HEALTH SERVICES
 PRINTING
 PRISONS
 PROSTITUTION
 PUBLIC ASSISTANCE
 PUBLIC HEALTH
 PUBLIC HEALTH ADMINISTRATION
 PUBLIC HEALTH DENTISTRY
 PUBLIC HEALTH NURSING
 PUBLIC HOUSING
 PUBLISHING
 QUALITY OF HEALTH CARE
 REHABILITATION CENTERS
 RESEARCH
 RESEARCH PERSONNEL
 RESEARCH SUPPORT (if other than U.S.)
 RESIDENTIAL FACILITIES
 RESIDENTIAL MOBILITY
 RURAL HEALTH
 RURAL POPULATION
 SANITATION
 SCHOOL HEALTH
 SCHOOLS (all headings)
 SHIPS

SOCIAL CONDITIONS
 SOCIAL ENVIRONMENT
 SOCIAL PLANNING
 SOCIAL SCIENCES
 SOCIAL SECURITY
 SOCIAL SERVICE
 SOCIAL SERVICE, PSYCHIATRIC
 SOCIAL WELFARE
 SOCIALISM
 SOCIETIES (all headings)
 SPECIALTIES, DENTAL
 SPECIALTIES, MEDICAL
 SPECIALTIES, NURSING
 STATE DENTISTRY
 STATE MEDICINE—STATISTICS
 TRAINING SUPPORT (if other than U.S.)
 UNIVERSITIES
 URBAN POPULATION
 URBAN RENEWAL
 URBANIZATION
 VITAL STATISTICS
 WATER POLLUTION
 WATER POLLUTION, CHEMICAL
 WATER POLLUTION, RADIOACTIVE
 WATER POLLUTION, THERMAL
 WATER SUPPLY
 WORKMEN'S COMPENSATION

Additional main headings to be subdivided geographically are those for the specialties, *Medicine, Science, Dentistry*, etc., and those that have the topical subheading: "education," "history," "manpower," "mortality," "occurrence," "prevention & control," or "supply & distribution," or the form subheading "directories," "legislation," or "statistics." Directories of specialists in the field, history of the practice in one locality, etc. are given the specialty heading subdivided by place.

Six topical subheadings which are not used for indexing serials and do not, therefore, appear in the list of *Subheadings* are necessary for the cataloging of books and periodicals. These are:

in adolescence (C, E, F, G)
 in adulthood (C, E, F, G)
 in infancy & childhood (C, E, F, G)

in middle age (C, E, F, G)
 in old age (C, E, F, G)
 in pregnancy (C, E, F, G)

When subheadings are used following main headings, they are listed in a fixed order: topical, geographical, form, language. Usually no more than one of a type is used in a string of subheadings. Rarely are all used at the same time. If one or more types are missing, the order of the ones remaining stays the same.

Occasionally the pattern seems to be violated. A heading, *PSYCHIATRY—period.—bibl.*, is assigned to a bibliography of periodicals on psychiatry, but the publication being described is not a periodical in form. Therefore, "period." is a topical heading, not a true form heading. Other similar combinations that may be used are listed with the form headings at the beginning of this section.

CUMULATED NEW HEADINGS

1977 Supplement

A cumulated list of new headings for prospective searching of *Index Medicus* and other MEDLARS-based bibliographies was published in the 1971 *Medical Subject Headings*. The present list, based on the introduction of new headings for 1977, continues a series of annual supplements to that cumulation.

The listing is alphabetically arranged by the terms which have been replaced or further subdivided by a more specific heading printed directly following the old term.

Users of *Cumulated Index Medicus* who are performing prospective bibliographic retrievals should consult these lists in order to assure that all citations on the subject will be found.

EXAMPLE:

1977 CHOREA, HEREDITARY—HUNTINGTON CHOREA

Prior to 1977 citations on this disease entity appeared under CHOREA, HEREDITARY. This term was deleted in 1977 and replaced by HUNTINGTON CHOREA.

1977 INVERTEBRATE HORMONES—INSECT HORMONES

INVERTEBRATE HORMONES remains as a main heading in 1977, but the specific heading, INSECT HORMONES was introduced in 1977. Citations concerning INSECT HORMONES that previously were listed under INVERTEBRATE HORMONES no longer appear under that term but are listed under the specific term INSECT HORMONES in the 1977 *Index Medicus*.
